

Compact surgical scrub sink are designed for use in OT complex providing surgeons with a convenient sink for pre-OT scrub up. Each fixture is fabricated from heavy gauge type 304 stainless steel and seamless welded construction, polished to a stain finish. The scrub sink is provided with a front access panel that should be easily removed for access to the water controlled valve, waste connections, stoppers and strainers. Hands free operation includes infra red sensors with built-in range of adjustment. Thermostatic mixing, valve control is located behind the access panel and maintain constant water temperature. User defined setting of 1 to 10 minutes are available.

This timing should be adjustable to meet individual application requirement. Provided with infrared sensors, thermostatic control taps with fail safe temperature controls. All units are having reduced anti-splash fronts. Foot operated switch is also there in case of power failure.

**Approximate Dimentions:**

Sink type	L	W	H
1 Bay	900 mm	565 mm	1380 mm
2 Bay	1600 mm	565 mm	1380 mm
3 Bay	2100 mm	565 mm	1380 mm
